Introduction

Healthcare is changing at a rate faster than ever before. Success in this new normal requires increased financial visibility, analysis and regulatory compliance. That is why, at Sage Intacct, we specialise in helping data-driven healthcare providers and facilities.

Sage Intacct provides real-time visibility into the metrics that matter. But don't take our word for it—the following are real Sage Intacct healthcare customer reviews published on G2Crowd and TrustRadius, leading B2B software review sites.

Washington Association of Community & Migrant Health

Flexible dimensions and excellent custom reporting make Sage Intacct a fantastic accounting suite.

5 Star Review

“In our small group, I’m the only accountant, so “separation of duties” is difficult to say the least. But we are able to use electronic approvals and signatures, and the Purchasing menu, so that non-accounting staff can help us stay in compliance. Sage Intacct allows us to make adjustments and reclass transactions easier while still maintaining an appropriate audit trail. Managers and decision makers now have a much higher visibility in real time of how their programs are doing financially. We used to have to export data to Excel, fill out template reports, to print and give managers on paper.”

Eric Griffith

Director of Finance & Operations, Washington Association of Community & Migrant Health

Clinical Management Concepts

Sage Intacct modernised our finance and accounting organisation.

4.4 Star Review

“Multi-entity support allows a single platform to support our entire enterprise from one place. Our users have a truly single sign-on and the user experience inherently assigns expenses and revenues across the appropriate entities automatically. Inter-entity transfers are made automatically and without extensive user intervention. Reporting on financial performance of the entire enterprise, or getting as granular as a single physical location for a single cost center is made easy with Sage Intacct.”

Jason Guinn
CFO, Clinical Management Concepts

OB Hospitalist Group

Seasoned product user.

5 Star Review

“I am better able to report results of operations to managers versus just generating financials. Dimensions rule and give the ability to slice and dice and really get to the heart of results to make informed management decisions.”

Marcie Kitchens

Accountant, OB Hospitalist Group

Vera Whole Health

Was able to decrease month end close from 5 to 4 days.

4.4 Star Review

“Being able to track expenses by project has led to fewer overages, which in turn means happy customers. We are able to provide project managers with real time reports showing where the project is at from an expense perspective. Additionally, we have been able to track the project expenses within each separate entity (we have 3) and additionally break the expenses down by department.”

Brian Goldrick

Director of Accounting, Vera Whole Health
